## **Correction: Evergreen in cell survey in PHOTON International**

Dear Chris,

Thanks for your email. Unfortunately, the footnotes in this article were mixed up. I am very sorry about that mistake.

As agreed, we will publish a correction in the upcoming issue:

In our March issue, a table on cell production and capacity data for approximately 200 companies that accompanied our survey of global PV cell production included an incorrect footnote for US-based Evergreen Solar Inc. (see PI 3/2011, p. 186). Regrettably, the note, which said the company had "declared insolvency," was intended for another company. The footnote should have read: "Evergreen announced it will close its manufacturing facility in Devens, Massachusetts, in 2011."

If you have questions, please contact me at any time.

Best regards,

Michael Schmela
